

PRODUCT DATA SHEET

SHOWERSEAL

DESCRIPTION

SHOWERSEAL is a clear brush-on solution that stops water penetration without having to remove the tiles. SHOWERSEAL is a durable waterproofer which penetrates into grout lines and tiles, sealing them without making the surface slippery.

PRINCIPAL USES

For sealing porous tiles and inhibiting mould growth on the grout lines.

BENEFITS

SHOWERSEAL is clear and will not discolour the tiles or grout.

SHOWERSEAL will not make tiles slippery.

SHOWERSEAL is simple and quick to apply, it only takes a few minutes.

SHOWERSEAL penetrates into the surface, providing long lasting protection.

PREPARATION

Ensure the surface is sound prior to the application of SHOWERSEAL. Severe surface or structural defects should be remedied by an approved tradesman. Remove all silicone or acrylic sealant strips. Use bleach to remove mould and fungus from all the tiles and grout. Remove all loose or flaking grout. Allow shower to dry for a minimum of 12 hours. Good ventilation will improve drying time.

APPLICATION

Working downwards from the top of the tiled area and on to the floor, brush a generous coat of SHOWERSEAL over the total surface areas concentrating particularly on all the grout lines. Ensure the entire surface is covered. Wait about five minutes and apply a second coat over the entire area, ensuring that the entire contents of the can is used. Wait a further five minutes or so and using a soft absorbent cloth, gently wipe off the excess material from the tiles. Allow SHOWERSEAL to cure for approximately 18 hours before using the shower. Brushes may be cleaned using mineral turps.

COVERAGE

SHOWERSEAL should be applied at a rate of about 8 square metres per 250ml.

PACKAGING

SHOWERSEAL is available in easy to use single pack kits consisting of one 250ml can of SHOWERSEAL, paint brush, a soft absorbent cloth and a full set of instructions.

PLEASE NOTE

New shower recesses and bathrooms must be waterproofed using DURAM DURABIT, MULTITHANE UV or DURAM 195. Please refer to the Product Data Sheets.
